Dear Hannah,

Re: Analyst, Data Sciences (Entry) - 4685

I am a current employee at IAG based in Melbourne working in the Business Performance (Motor) team reporting to Luke Gillett.

My education background is in Statistics and Psychology, I am also currently studying towards a Master of Data Science. Most of my University career has been spent building and analysing statistical models using R and Python. Additionally, I have experience with object-oriented programming, namely Java.

It would be great to have an opportunity for an interview where we could discuss how I could potentially contribute towards incorporating analytics into IAG's business operations.

Thank you.

Yours Sincerely,
Oliver Eaton
